Cont'd...2/-

-2-

(Class 5, English, 11.5.2015)

VIII. Punctuate the following sentences:

$(\frac{1}{2} \times 4 = 2)$

1. she is going to the market
2. where are my shoes

IX. Read the passage carefully and answer the following questions :

Often mistaken for insects, spiders actually belong to a different classification of creatures, called Arachnids. They're insects' worst enemies. Although a few species, such as the Black Widow and the Brown Recluse, are dangerous, the majority are harmless to humans. Moreover, they can be helpful. Pest control, for example is just one of the many ways spiders can help us because they kill far more pests than commercial insecticides do. In the future, perhaps if farmers employ armies of spiders to protect their fields, our grocery bills will be lower and our soil, water and food will have fewer pesticide remains.

1. Answer the following questions:

$(1 \times 2 = 2)$

- a. Name two dangerous species of spiders.
- b. How can spiders be helpful to us?

2. State whether the following statements are true or false:

$(\frac{1}{2} \times 4 = 2)$

- a. Spiders are also insects.
- b. Spiders can kill more insects than commercial insecticides.
- c. Spiders are of no use to humans.
- d. Farmers can employ armies of spiders to protect their fields.
